## StowAway Tie Down Rings Instructions:

1. Using the socket wrench on the bolt and the adjustable end wrench on the nut, loosen, and remove the four bolts that attach the StowAway box to the steel frame, keeping the washer in place against the bottom of the box.
2. Place the tie down ring in such a position as to line up the hole with the washer and hole in the bottom of the box.
3. Re-insert bolt through the tie down ring, washer, StowAway box, and steel frame.
4. Tighten the lock nut onto the bolt using the two wrenches.
5. Repeat for remaining rings.
